

Invitation to Participate

Co-Parenting Children Survey

WE WANT YOUR INPUT!

What is this survey about?

We are a team of researchers involved in supporting parents' involvement in the raising of their children. We have a survey to learn about co-parenting in different family situations, whether parents live together or apart.

Please participate if:

- *If you are a parent of a child under 18 years old*
- *You are married, separated, divorced, or never lived with the other parent*
- *You are both involved with your child*

What You Do:

Complete an online survey that should take no longer than *10-15 minutes* to complete. You will be asked some questions about co-parenting with your child's other parent and some basic informational questions about yourself and your child.

Your information is completely confidential and anonymous – that is, we will not have your name, identifying information and cannot connect your answers to you in any way. A copy of results can be made available to you once the study is completed.

Please use the following link to take you to the survey in any one of 6 languages:
